

Task 5.2C Extended Slide Deck

This is an Individual Credit Task

Slide Deck Task Overview

Reviewing and revisiting your project content and updating your pitch deck is an important step in any innovation project.

This Credit Task requires that you build upon the content that you researched, formatted, and presented in tasks, 3.2P, 4.1P, and 5.1P. You should also use the feedback provided from all three tasks to extend your work and get it ready for your next Pitch.

The focus of this task is to update your content based on the feedback received, incorporate appropriate graphics to support and enhance your content, and design or select a Slide Deck design to showcase your topic/solution.

Therefore, in this task you will extend your topic research in the five (5) main sections outlined below, apply feedback from earlier tasks, and enhance the link between your content and topic through the inclusion of appropriate use of data, tables, images and designs.

The sections that need to have content included within them are outlined below:

1) The Vision / Value proposition

- This section should include a short (one sentence) statement about the unique value that your solution can provide to the target market, customer, or audience.

2) The Problem

- This section should include a clear outline of the problem that you are trying to solve and who is affected by this problem.
- This section should convey a story about why solving this problem is important and the change it could bring.

3) The Market

- This section should explain who your ideal or target customer is, it should include information such as how big this market is.
- It is important to note that the market might be broken into several segments to which your solution might appeal to all or just a subset, this might mean that you adjust your solution slightly for the different subsets.
- Or you might focus on meeting the needs of just one subset at the start.
- In this section you should make use of data with references to show the size of your market, this can be done through figures or tables.

4) The Solution

- This section should clearly outline, define, and describe the product or service that you are suggesting as the solution to your problem statement.
- Within this section you should talk about how your customers would be expected to use your product and how it addresses the problem that you have outlined.
- You can include a rough design sketch or images to help illustrate your solution.

5) The Competition

- This section should outline how your solution will fit into the current market or with the current competition. Within this section you will need to clearly outline how your solution is different/better than the current competition and why customers would move to your solution.
- This section can also be where you can include information about what customers would be happy to pay for your product based on current solutions.
- You should create a comparison table (or equivalent) for the competitors that you find indicating the key features that they have in comparison to your solution.

6) References

- This section you should include all your reference for the content that you have included within your Slide Deck.
- Remember you should also include reference for the sites that you have visited that have inspired your thoughts and ideas for your topic.
- All references should be provided in the Harvard Referencing style. Guidelines for referencing can be found: <https://www.deakin.edu.au/students/study-support/study-resources/referencing>

For this Credit Task you are not limited to 6 slides you may decide to have multiple slides for each of the 6 sections. However, remember that if you were to present this content it **should not exceed 5 minutes**.

Individual Reflection Questions:

To accompany your Extended slide deck, you will need to complete the following reflection questions:

1. How do you think the feedback you have received from your earlier tasks has helped you to improve your extended slide deck.
2. Do you think the inclusion of appropriate images and the selection of your own slide deck template has made a difference to the overall presentation and persuasiveness of your pitch?

Task Submission Details

You are required to submit the following two files:

- **File 1:** You are required to submit a copy of your Slide Deck (this can be in the format of a PowerPoint Presentation, or equivalent); however, the Slide Deck itself is needed to be submitted as a PDF file to the OnTrack platform.
- **File 2:** A document containing your answers to the reflection questions presented above relating to how the inclusion of images, additional content, and references has improved your work from the Pass standard.

Remember, anytime you submit a task to OnTrack, it is a good practice to check the status of any existing tasks, and the future tasks you are expected to complete. If you have received feedback on previous tasks, you may need to fix and resubmit some of your work. You want to check out why, so that you can learn from this and make it faster and easier to accomplish later work to the required standard
